

AIRplus® Bag Separator and IDS

The AIRplus® Bag Separator and the AIRplus® IDS (Intelligent Delivery System) reduce handling — providing ergonomic benefits that help increase throughput and lower operational costs. Air bags are automatically separated and fed into overhead hoppers to be dispensed at single or multiple work stations.

- Maximize production space with smaller footprint
- Reduce handling/touches
- Lower operational cost
- Improve working comfort with better ergonomics
- Increase throughput

Increase throughput and lower operational costs

AIRplus® Bag Separator

The AIRplus® Bag Separator conveniently separates air bags into single bags or in strips of pre-determined lengths for optimal application. In addition, providing packers pre-separated air bags means fewer touches of bags during packing resulting in less worker fatigue and faster production.

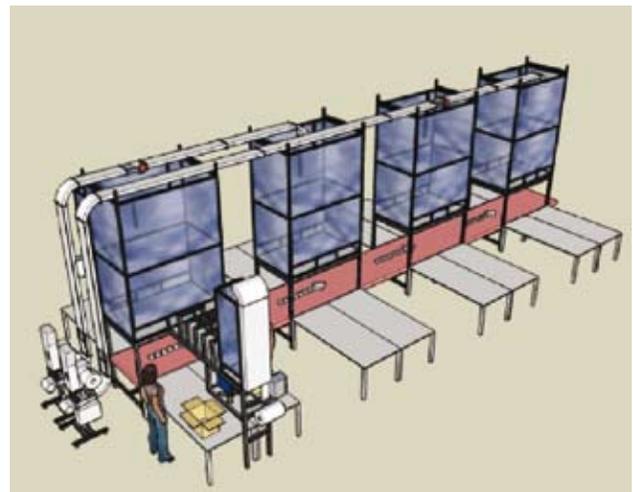

Specifications

Size: 32" H x 20" W x 15" D
Weight: 74 lbs
Power: 120 v
Speed: 18 fpm

AIRplus® IDS

As bags are separated they're fed into overhead hoppers then dispensed at the work station for fast and easy application by the packer. With the IDS, one AIRplus® machine with a Bag Separator can deliver bags to a single work station or help you maximize your packing capability by delivering bags to multiple work stations.
